[mixing tutorial](#) : your first steps to symtonic mixing.

[keyboard shortcuts](#) : sometime usefull.

[chat tutorial](#) : how to use it.

[login tutorial](#) : the way to use your personal locker.

mixing tutorial	
Choose a style or your style (see login section).	
Symtonic is connecting the videobase.	
<p>Symtonic is extracting randomly 6 files in the style you've chosen, files are downloaded with some usefull informations : their names, creators, dimensions, number of frames, and their sizes.</p> <p>There is a progressive download bar usefull for bigger files.</p>	
Let's drag one of the files...	
...and drop it on the layer 2	
Let's choose another style.	
Let's choose the nice gradient from Craker and drag and drop it onto layer 1.	

Let's choose the "olympiques" animation and drag and drop it onto layer 3.

This is our selection, let's MIX !

keyboards shortcuts

chat tutorial

Select the chat Menu :

Here is the chat dock, it work also as a instant message billboard !

<p>here's your default name, not really nice isn't it ?</p>	
<p>let's change it to a cool one, you don't need to log the server (see login section)...</p>	
<p>...but you need to select again the chat to get your pseudo activated !</p>	
<p>login tutorial</p>	
<p>You're a register member ! you can use your personnal locker.</p>	
<p>Your style is selected by the server...</p>	
<p>...and it appears at the bottom of the style selector !</p>
